		California High Speed Rail Authority		
	Annual Small Business Diversity and Resources Fair 23-October-2024 9:00 am - 2:00 pm			
		U.C. Merced Conference Center		
Name of Prime:	California Rail Solutions (Hitachi Rail / L.K. Comstock Consortium)			
New Business Opportunity	Source	Scope of Work	Skill Set of SB/MB/DBE/DVBE	Current / Proposed Project
Electrical Wiring and Assembly	Hitachi Rail	The wiring and testing of equipment racks required for train control and communication	Experience wiring and testing industrial equipment racks	Train Control and Communications Progressive Design Build
Project Management and Controls	Hitachi Rail	Provide project management services for Project	Experienced schedulers, cost controllers, risk managers, document controllers, and administrative positions	Train Control and Communications Progressive Design Build
Environmental Compliance	Hitachi Rail	Manager the environmental compliance requirements of the Project per Section 18 of the draft Traction Power T&C's	Knowledge and experience in managing similar environmental compliance requirements	Train Control and Communications Progressive Design Build
Sustainability Management	Hitachi Rail	Manage the sustainability requirements of the Project per Section 19 of the draft Traction Power T&C's	Knowledge and experience in managing similar project sustainability requirements	Train Control and Communications Progressive Design Build
Education and Public Involvement	Hitachi Rail	Manage the education and public involvement requirements of the Project per Section 24 of the draft Traction Power T&C's	Knowledge and experience in managing similar project education and public involvement requirements	Train Control and Communications Progressive Design Build
Partnering Facilitation	Hitachi Rail	Provide partnering facilitation services of the Project per Section 2.3 of the draft Traction Power T&C's	Knowledge and experience in partnering facilitation	Train Control and Communications Progressive Design Build

Design engineers with highspeed rail ETCS and

and systems communications testing experience

Large construction site and facility security and

Experience with large scale waste removal from

Experience with construction safety management,

OSHA/CalOSHA requirements including safety certified

Ties to the local contracting community and experience

Experience in construction equipment maintenance and

repairs - must be properly equipped with mobile tooled

Properly licensed and certified mobile fueling service

Experienced traffic control contractor with trained staff

Experienced and licensed electrical contractor

Experienced and licensed fence contractor

Experienced and licensed SWPP / erosion control

Experienced and licensed civil / dirt work contractor

Experienced and licensed civil / concrete contractor

Experienced and licensed landscaping / irrigation

Construction equipment / tool rental experience and

Engineers and technicians with highspeed rail ETCS

systems communications design experience

Commercial facility janitorial experience

Administration assistant experience

in managing compliance and outreach

and proper vehicles/equipment

patrolling experience

construction sites

Train Control and Communications

Hitachi Rail

L.K. Comstock

Design Engineering Support

Support

Janitorial Service

Security Services

Administration Support

Waste Management Services

Safety Management Services

S/D/M/WBE Compliance Program

Management and Administration

Equipment Mechanic Services

Equipment / Tool Rental

Traffic Control Services

and Erosion Control

Site Civil Grade Prep

Landscaping / Irrigation

Concrete Foundations

Fencing

Onsite Electrical Installation

Storm Water Pollution Prevention

Fueling Service

Site Testing and Commissioning

Support the design engineering team with

and commissioning of the train control and

Site security, patrolling, and fabrication facility

Reception, document control, general

Domestic and industrial waste removal

Management and compliance oversight of

Rental services on construction equipment and

Onsite construction equipment maintenance and

Execute MOT plans and provide onsite traffic

Onsite electrical installation services, conduit,

Installation, maintenance, and removal of storm

water prevention and erosion control measures

Installation of permanent and temporary fencing

S/D/M/WBE program and participation

Onsite safety oversight and training

Technicians and engineers to support the testing

resources to fill local staffing needs

communications subsystems

Office & facility cleaning
